

## Increase Your VoiceLine Savings!

*Adding another line or additional phone numbers provides more opportunities to save*

### **With VoiceLine, you can:**

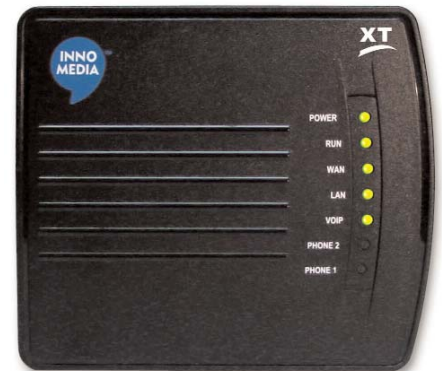

- Add multiple telephone numbers to a single account
- Activate a second line and assign a different calling plan to each one

### **Add Multiple Telephone Numbers**

*You can now add multiple telephone numbers to your VoiceLine account! Additional phone numbers costs as little as \$5 per month and there is no limit to the amount of numbers you can have.*

*By adding telephone numbers, you can easily increase your savings. For example:*

- Small businesses can obtain phone numbers in countries where they have customers, business contacts and/or satellite offices. By establishing a local presence, their contacts can call a local number to reach the company.
- Residential customers can obtain a phone number in countries where they have friends and family. Then, their contacts in these countries would no longer pay international rates when calling them.

### **Increase Your Call Capacity**

*You can increase your call capacity by adding a line to the second port on existing devices or acquiring additional devices. Additional lines will enable multiple employees in a small business to place and receive simultaneous calls. Adding lines in a residential environment will allow multiple family members and/or neighbors to use the VoiceLine service at the same time.*

*Since multiple users in the same location may have very different calling patterns, VoiceLine enables you to assign a different calling plan to each line in order to maximize your savings.*
