

VoiceLine Offers Low-Cost Faxing!

VoiceLine customers can send and receive faxes from their InnoMedia MTA XT 6328-2Re telephone adapter

No special plans or subscriptions are required!

Another Way to Save

VoiceLine now enables you to send and receive low-cost faxes worldwide.

Faxes can be sent and received under your current plan - no additional charges apply.

By activating a second line, you can even speak on the phone while sending or receiving a fax.

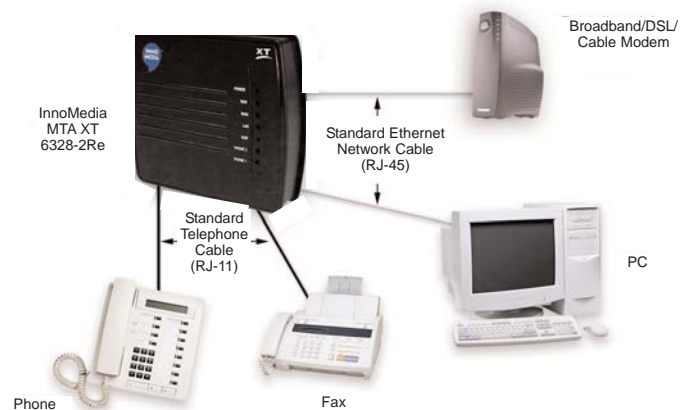

*InnoMedia MTA XT 6328-2Re
(Telephone adapter with router)*

How it Works

Simply connect a fax machine to a phone port on the InnoMedia MTA XT 6328-2Re that is associated with a calling plan.

If you frequently send/receive faxes or wish to speak on the phone while faxing, you can add a second calling plan and use both ports simultaneously.

Contact your sales representative for more information!

* You will need approximately 70 Kbps of bandwidth for sending and up to 90 Kbps for receiving faxes. For simultaneous fax/phone calls, you will need between 100 and 170 Kbps.
